## BATTER BAKING OVEN

Composed of 63 sheets (350\*530) with iron chassis. The main frame is made of stainless steel N.O. 304 the machinery is equipped with an automatic elec-tronic outage in urgent cases. Wafer baking machinery has the capacity of 1860 wafer sheet/ h. furthermore, the machinery is equipped with fireproof ball bearings. The utilized food grade grease in ball bearings is from kluber Co,Germany. The heating system embedded in baking machinery is gas log type and accurately designed to monitor temperature.

## ATLAS EGHTEDAR SANATGARAN

### CREAM SPREADING MACHINE

Manufactured by stainless steel components. The machine is used for sandwiching wafer sheets with a capacity of 35 wafer sheets per minute and may produce 2 - 9 layer wafer sandwiches. Depending on production capacity, The wafer thickness can be customized up to 3 mm. additionally, sandwich weight is kept fixed through keeping cream thickness

### WAFFER SANDWICH COOLER

To cool produced sandwich in cream spreading machine, cooling machine is being used which has 103 - 250 N.O capacity. This machine is made of high quality sandwich panel with 6cm thickness to inhibit energy waste and equipped with HP 4 -10 compressor. The machine is made of steel sheet or chrome-nickel coated steel pieces

## CREAM MAKER

Manufactured by iron chassis and main frame made of stainless steel N. O. 304. The machine has the capacity of 400kg cream in 20 minute. Cream mak - er is equipped with inverter system (fast & low rps) to augment security index of main engine. The machine further contains a proper mixer to produce light and puffed cream to use in biscuit and wafer. This machine can be designed and manufactured in two capacities of 400 and 250 kg

## TUNNEL OVEN MACHINE

Tunnel oven with iron chassis and stainless steel frame has 3 zones with a width of 1 meter and a length of 36 meters. The production capacity of this oven is 700 to 1200 kg/h for the layer cake production line and 900 to 1300 kg/h for the biscuit production line with 4 zones with a width of 1.20 meters and a length of 44 meters. This machine in the cupcake production line with a width of 1.70 meters and a length of 36 meters, has the ability to bake 800 to 1300 kg/h. The tunnel oven in the cookie production line has 6 zones, 1 meter wide and 60 meters long, and has a baking capacity of 600 to 1300 kg/h. With the addition of each zone, the length of the machine increases by 11 meters.
